

# AFCONA - 1102

## **Chemical Composition**

Modified Polyacrylate polymer

## **Product general description**

Universal dispersing resin for preparation of universal pigment concentrates, cheaper version of AFCONA – 1101.

## **Product properties**

AFCONA – 1102 is designed for use as universal resin for the preparation of universal pigment concentrate.

To formulate stable pigment concentrates with wide compatibility AFCONA – 1102 must be combined with any of high molecular weight dispersant from AFCONA 4000 series or with AFCONA – 5280. The stability and deflocculation ability of the pigment concentrates is highly depended on the dispersant selected. On the other hand, the compatibility of the pigment concentrates depends not only on the selected dispersant, but also the universal resin chosen in the formulation.

AFCONA – 1102 is compatible with most of the resin systems like Polyurethane, alkyd melamine, acrylic melamine, polyester melamine (butylated and HMMM grade), acid curing etc. The known resin systems that are not really compatible are epoxy systems as well as air drying alkyd systems where white spirit, LAWS and aliphatic hydrocarbon solvents are used in large amounts.

The pigment concentrates that prepared through AFCONA – 1102 or AFCONA – 1101 have below different properties:

- 1) AFCONA – 1101 better in viscosity reduction.
- 2) AFCONA – 1102 gives better compatibility, especially in thermoplastic resins and epoxy.
- 3) AFCONA – 1102 is more economic than AFCONA – 1101.

## **Product Specification**

Non-volatile matter	59 - 61%
Solvent	Butyl acetate/PMA
Density at 20°C	1.01 – 1.04 g /cm <sup>3</sup>
Flash point	35°C
Gardner colour	Max. 4
Appearance	Clear to yellowish liquid

## **Addition and dosage**

Inorganic pigments : 4 - 5 times of solid dispersant  
Organic pigment : 3 – 5 times of solid dispersant

## **Incorporation**

AFCONA – 1102 is recommended to add in before milling.

## **Storage**

AFCONA-1102 should be stored in a cool and dry place. When kept in an original unopened container, it will keep up for 5 years from the date of manufacture. The expiry date is indicated on the container.

## **Packaging**

25kg and 200kg non-returnable containers
